General Weather Conditions

WASHINGTON, Dec. 14.—The disturbance that covered the Atlantic states Saturday has passed eastward to the Atlantic Ocean and the weather has cleared throughout the Eastern states. High pressure now provails generally over the United States, with the maximum pressure 30.36 Inches over Idaho. The weather has become decidedly colder over all regions east of the Mississippi River and along the Northwestern border. The temperature has moderated in the middle plains states and the Rocky Mountain region.

Temperatures are now much below normal over all parts of the country except southern Florida. During Sunday freezing temperature was reported throughout the Gulf states. Sub-zero temperatures prevail along the border from upper Michigan westward to the Rocky Mountains and over the western plateau region. Within the last twenty-four hours there were rains and snows in the middle A lantic and New England states, rains in the south Atlantic and east Gulf states and snows in the upper Ohio Valley and the region of the Great Lakes. The weather remained fair in all other regions.

The outlook is for fair weather Morday and Tuesday east of the Mississippi River, except that snow flurries are probable near the Great Lakes.

Cold wave warnings have been issued for porthers and coverts! Plaife.
